

Protect

All natural stone is porous to some degree. If not properly treated with a protective sealer, water, oils and other liquids can easily penetrate the stone, leaving unsightly stains that damage the stone. The same is true with the grout surrounding tile. The good news is that once treated with a protective sealer, natural stone, tile, masonry and grout is ready for carefree, everyday use.

Sealers

 <p>MAXIMUM BulletProof[®] SEALER</p>	<ul style="list-style-type: none"> ◆ Maximum protection against most stains ◆ Advanced penetrating microbond protection ◆ Preserves natural look ◆ Interior and exterior use ◆ Water-based 	<p>For Use On: Natural stone such as marble, granite, limestone, travertine, sandstone, saltile and bluestone.
